Re: APPL MP-432

Dear Ms. Rosenson:

I understand that a petition in opposition to the Planning Board's recent approval of application MP-432 has been submitted to the Board of Representatives. After a thorough review, we have determined that the petition does not include the requisite number of signatures representing owners of at least 20% of the land within 500 feet of the Master Plan change. Thus, we contest the validity of the petition. I recognize that your office will be conducting your own independent review of the petition validity and will make a recommendation to the Land Use committee of the Board of Representatives on January 30th. Please let me know if you or the representatives require any information from the applicant and we will provide it in advance of the meeting.

Sincerely,

THE STRAND/BRC GROUP LLC
