iis is a	State	tunded (LO	ICIP) proje	ct. It is plar	nned that t	he project will	start in this	s construction	on season t	o allov	v us to bu	ild temporary	roads to t	he immed	ediate east	of the p	proposed ro	und-	

ways while simultaneously keeping traffic flowing. The closure of So. State St. will most likely increase traffic through the area even though there is an alternate detour planned using ous detours during the multiple stages of the project.

> CTDOT had always intended to close So. State St during the construction of the new train station garage. TT&P had always requested that they proposed rehabilitation of the So. State St bridge take place while the roadway was closed to construct the garage. TT&P was just informed by CTDOT that they have to have the bridge work complete ahead of the garage being built. They now have to start the closure of So. State St. beginning April 2021. So. State St was always scheduled to remain closed for the first 18 months of garage construction.

This shaded area depicts the months that the asphalt plants typically close each year.
