Subject: Ban on plastic straws

To my District Reps and L&R Committee Members,

Thank you for the important work you do and for the personal sacrifices you make to help our city.

I have been following the news in the Advocate about the plastic straw and stirrer ban.

I would like to encourage the city to BAN ALL plastic straws and stirrers.

The environment impact of these items is particularly devastating.

I understand considerations must be made for those with disabilities, however, I am hoping you can arrive at a solution which will accommodate those individuals without diluting this law.

I would like to be advised of meetings where the public can attend and comment on this issue.

Thank you,

Jennifer Henkind
