

Written Comments on PR31.017 – Establishing Fees for Summer Camp Programs (please limit to 450 words)

To, the Parks and Recreation Committee,

This is Kieran Edmondson, a resident of the Waterside neighborhood, of Stamford, Connecticut, and I am writing this brief letter, for the 3rd time to the members of this committee, of the 31st Board of Representatives, about proposing another economic budget, for those young boys and girls, to attend Summer Camp Programs between June-August, in order for them to have all of the money benefits, to be taken care of, before they start the 2023-2024 academic school year, in every educational institution of the Stamford Public School system.

To the Parks and Recreation Committee, since that Summer Camp is one of the popular activities, that many young children are participating in, after the end of their academic school year, and before the beginning of their new school year, I need to have every one of you, to consider proposing another economic policy, in order for many Summer Camp Programs, to be additionally funded for our young people, so their parents can pay it for them, for nearly 7 weeks before they start school, so our kids must meet the needs, of their recreational activity during the Summertime, starting late next month in June.

To the Park and Recreation Committee, please carefully consider paying this another economic policy, for Summer Camp Programs to be funded.

From, Kieran Matthew Edmondson
