## Stamford WPCA Top Issues (12-19-16)

| No. | Issue  | Action Description  | Impact                       | Status   | Schedule  |
|-----|--|---|------------------------------|--|---|
| 1   | Extreme wet weather -<br>high flow discharge and<br>permit exceedance on<br>5/1/14 | Perform an Infiltration and Inflow (I/I)<br>Study to identify and remove<br>extraneous flows caused by rainfall and<br>high groundwater | Regulatory and<br>Operations | Flow monitoring and<br>pilot SSES for sub area<br>with high I/I has been<br>completed. Pilot SSES<br>identified sewer and<br>manhole rehabilitation<br>totaling \$264,000.<br>Engineer preparing<br>technical specifications<br>for sewer rehab.   | Have submitted Engineer's<br>reports on extended flow<br>monitoring and pilot SSES to<br>CTDEEP for approval.<br>Engineer's proposal for next<br>phase of SSES has been<br>approved by Technical<br>Committee and forwarded to<br>CTDEEP for prior approval for<br>grant eligibility. |
| 2   | UV System Performance<br>and Permit Exceedances                                    | Improve reliability of UV disinfection<br>system to avoid permit exceedances.   | Regulatory and<br>Operations | Selection Committee<br>reviewed qualification<br>packages from 3<br>Engineers for design of<br>the UV and has<br>submitted its<br>recommendation for<br>award to City<br>Purchasing.   | Execute agreement with<br>selected Engineer by February<br>2017.  |
| 3   | Odor Control   | Minimize odors off site at treatment plant  | Operations                   | All odor control<br>scrubbers and carbon<br>canisters are on line.<br>Adding sodium<br>hydroxide for pH<br>control to primary<br>clarifiers scrubber. Will<br>be adding sodium<br>hydroxide to solids<br>processing building and<br>raw sewage pumping<br>building scrubbers as<br>well. | Schedule for construction of<br>storage building to house<br>sludge trailers needs to be<br>reviewed in light of other<br>capital projects needs  |
| 4   | Only one Class 4 Operator<br>for the treatment plant on<br>staff.                  | Have two Class 4 Operators on staff   | Operations                   | Rob Pudelka started on<br>12/5/16 as our new<br>Assistant Plant<br>Supervisor having a<br>Class 4 Operator license   |   |

| 5 | WPCF evaluations and improvements                               | Engineering evaluations required in<br>response to USEPA Admin Order. Study,<br>design, and construct WPCF<br>improvements to replace aged<br>equipment and increase operations and<br>energy efficiency. | Regulatory and<br>Operations                             | Conversion of first PLC<br>to new SCADA system<br>occurred on 12/13.<br>Received 1 bid for<br>construction of Flow<br>Distribution<br>Improvements,<br>awarded to CH<br>Nickerson for<br>\$4,187,202. | Installation of new SCADA<br>system to be completed by<br>3/1/17. Begin construction of<br>Flow Distribution<br>Improvements in Spring 2017.<br>Agreement with Wright-Pierce<br>for design of Headworks<br>Upgrade and Secondary<br>Treatment Improvements will<br>be reviewed by Technical<br>Committee in January.           |
|---|---|---|--|---|--|
| 6 | Personnel Safety  | Comply with requirements for arc flash protection.  | Operations   | Technical specifications<br>for electrical system<br>preventive<br>maintenance for WPCF<br>and PS to be completed<br>by end of year.  | Holzner Electric Co. will begin<br>construction of electrical<br>upgrade of Dyke Lane Storm<br>Water PS as soon as we receive<br>authorization to proceed from<br>EDA.   |
| 7 | Connect to Existing Sewer                                       | Enforcement of City ordinance to<br>connect to existing sanitary sewer<br>within 180 days after notification.<br>Identify and bill those connected to a<br>sanitary sewer but not being billed.           | Protect public<br>health and<br>expand customer<br>base. | Have retained a<br>seasonal employee to<br>investigate and identify<br>properties not<br>connected to existing<br>sanitary sewer, or<br>connected to sewer but<br>not being billed.                   |  |
| 8 | Update and revise<br>SWPCA's written policies<br>and procedures | Update SWPCA policies and procedures<br>to describe current practices and<br>provide guidance to SWPCA Board, staff<br>and customers.   | Operations and<br>Financial                              | Proposed City<br>ordinance describing<br>responsibility for<br>building lateral<br>maintenance and repair<br>was revised and is<br>being reviewed by BOR<br>Operations Committee.                     | SWPCA personnel policies have<br>been assembled into a draft<br>employee handbook by SWPCA<br>Admin Staff which was<br>presented to Operational<br>Policies Sub Committee in<br>December. SWPCA Admin Staff<br>working on revising policies for<br>collection of past due user<br>charges and sewer and<br>connection charges. |
| 9 | Wedgemere Road Sewer<br>Project                                 | Need to acquire necessary easements for construction  | Operations   | Sewer for Emerald and<br>White Oak Lanes in<br>final design.  | Waiting on response from<br>homeowners on easement<br>request for alternate route for<br>Wedgemere Rd sewer.   |
