

Announcing:  
Newfield Parents Facilities Task Force Meeting  
THURSDAY, FEBRUARY 21  
6:30-8:00pm  
Newfield Auditorium

Dear parents, faculty, staff, custodians, friends, board of education, board of finance, board of representatives, Mayor, Mold Task Force, engineering, planning board, Superintendents, all outside contractors working on mold remediation/construction:

We cordially invite you to an open discussion hosted by the Newfield Parents Facilities Task Force. Our group formed to advocate for the facilities at Newfield Elementary School. We have attended many board meetings, mold task force meetings, met individually with city officials, superintendents, parents, teachers, and each other to understand the current state of our facilities.

We invite you to join us so that we may gain answers and knowledge surrounding where things currently stand with our school, and to take a candid look at the institutional history. We strongly feel we ***must*** look back in order to successfully move forward.

While we have our own queries and information, we welcome any questions and input you have to share. Our goal is complete transparency and community building, where parents can share their concerns without feeling constrained by time.

We plan to compile the information and make suggestions for the mold task force as they propose their own procedure safeguards for the future. Most importantly, we want to collaborate with the board of education as a school community.

Please rsvp as soon as possible to Reischea Kapasouris at [reischea@gmail.com](mailto:reischea@gmail.com) so that we may know who will be attending. If there are questions you have prior to this session, send those along as well.

Thank you for your concern for our kids.  
The Newfield Facilities Parent Task Force
