Legislative & Rules Committee

Paul Plotkin submitted the committee report and upon committee recommendation MOVED that some competent authority be contacted to come in, examine the area and make known to the Board the best and most practical location for the new Turn of River Fire Department Station #2 prior to adoption of the proposed lease, seconded by James Mulreed.

Patrick Scarella MOVED seconded by Stephen Kelly that Mr. John Stashenko present in the audience be heard inasmuch as he was on the Building Committee of the Turn of River Fire Dept. and would in all probability have all of the facts. Carried.

John Stashenko stated that he had in his possession a map which had been pinpointed by the Board of National Fire Underwriters and that the proposed lease covered property only 300 feet away from this pinpoint, if that. He stated that much time and study had been given to the site and after careful consideration this property was chosen as the best location to erect Station #2.

Considerable controversy followed re the condition of the roads, access to the adjoining highways, the closeness of the new school, children en route to and from school, etc.

John Cook MOVED for a recess, seconded by George Russell and Carried in order that the Legislative & Rules Committee might caucus to review the findings as submitted by Mr. Stashenko.

At the expiration of the term the buildings will become the property of the City of Stamford. The committee concurs with the requirement requested by the Board of Finance to be incorporated in said lease that the Turn of River Fire Department, Inc. be required to take out public liability insurance for said premise each year in an amount satisfactory to the City of Stamford and as approved by Corporation Counsel.

This ordinance shall take effect upon the date of its enactment.

Duplicate names of streets

Paul Plotkin stated that the Corporation Counsel advises that the proper procedure for the Board is to enact an ordinance for each change. The committee felt that the Planning Board should first approve such a change although such an approval is not required. The committee is awaiting action by the Planning Board.

Alanson Fredericks Suggested that all committee reports of factual
importance be mimeographed and distributed to all members to avoid
the necessity of time involving discussions at the meeting, the
members thereby being fully acquainted with the facts.

Patrick Scarella said this was practically impossible inasmuch as most
of the committees met after the Steering Committee which meets the
last Tuesday of each month and the time was insufficient to get the
report mimeographed and mailed.

Health & Protection Committee

Thomas Killeen submitted the report stating that Mr. Price, Director
do Civil Defense had assured the committee that all Civil Defense
equipment was available for use of the regular or volunteer fire
departments at any time. Mr. Price also suggested that Chief

the fire boat for an emergency in case Mr. Price's man would not be
available. The committee stated it had no objection to the Kiddie
Amusement Park at Bull's Head providing State and local ordinances were
observed. Training program progress letters were received from both

Mayor and Chief Kinsella be requested to advise the local taxi
companies and the bus companies of the many complaints received

The Reflectone Corporation has agreed to construct, adequately covered by insurance and connect the electric power lines for the use of this firing range for approximately three months. During this period same can be used by the Stamford Police Department anytime it is not used by Reflectone Corporation. Rutherford Huizinga spoke about the microphones and loud speaker that was temporarily installed for the evening, services and equipment having been graciously donated for a try-out by Thomson Electric Company of Glenbrook.
