0351 **Stamford Fire Department**
C56212 **FACILITIES IMPROVEMENTS**

Central and other Fire Station capital improvements per engineering study. This multi-year project is currently in progress. The existing carpeting @ three (3) Fire Stations should be removed and replaced with a hard cleanable floor covering. The carpeting has been routinely cleaned, but is worn out, become an eyesore, health and tripping hazard. The existing carpeted areas needs to be removed, underlying floor cleaned, prepared, remediated (if needed and replaced with a clean / non-slip surface). Several other fire stations have had the requested floor coverings installed and we are pleased with the results. These areas are able to be maintained in a routine and hygienic manner, at minimal ongoing expense.

We are utilizing an apparatus replacement schedule where front line vehicles are in service for approximately ten years. Once an apparatus is removed from front line service it is utilized as reserve apparatus for additional years. A Tanker Vehicle is required to ensure water supply to those areas in the City without hydrant water supply. This is a critical piece of apparatus for response to the Northern part of Stamford. Engines are the basic fire department response vehicle, otherwise known as a pumper truck. Currently the city owns 13 front line Engines and 3 reserves. Replacement Engines are needed for Shippan Area and South-end area both 2004 vintage apparatus and 2 needed to replace an aging volunteer fleet.

Conversion of the remaining roadway lighting fixtures (over 5,000 fixtures) within the city to LED street lights. The lower wattage 50 and 70watt high pressure sodium fixtures have not been upgraded to LED light fixtures due to the continuous efficiency improvement of new LED products. Manufacturers have just released products which are now as low as 15-25 watts to replace these lights. In addition to saving energy, with the longer life of LED products, maintenance cost will also be decreased.

SCA has begun the process to address the issues with water damage to the South wall. We have hired a construction firm to open samples areas and an engineering firm to assess the situation. The scope of repair is expected to include repointing the brick wall, removing and replacing the wall end cap and resurfacing the wall. We have been advised by our engineer that this should be addressed before or in conjunction with the roof repair.

CP3680 **MAIN BUILDING RENOVATION**

Recommendations from 2010 Master Plan have identified equipment that is past it's useful life. With recent interim repairs to two major Leibert climate control units (one for galleries and one for collection storage) installed in the early 1980s, replacement with more energy efficient units is highly recommended as a pro-active step.

CP3809 **CENTRAL FIRE HEADQUARTERS RENOVATION**

Central Fire Headquarters @ 629 Main St. Facilities Management has recommended that we replace the perimeter PTAC HVAC units. More than half of the existing units do not work, these type of units are difficult to work on, parts are expensive, replacement units will NOT be any more reliable than the existing systems. A recommendation will be to switch to a split HVAC system to take care of problem areas throughout the building. These new systems should be tied into the recently installed Energy Management System. Facilities recommendation @ \$150,000. Removal of existing flooring material, installation of clean / non-slip epoxy flooring surface.

CP4215 BARTLETT ARBORETUM HEATING SYSTEM REPLACEMENT AND RELATED REPAIR

City experts recommended total replacement and upgrade of heating system and related repairs several years ago citing the inefficiencies to the building and in fuel usage. Since the City took over the property in 2003 there has been no capital funding for upgrades to the Visitor Center structure and infrastructure...some elements now dating back over 70 years. Although not a registered historic property, this house was the original homestead of Dr. Francis Bartlett and has historical significance to the property and the community. Before the issue becomes a true emergency...which is getting closer each year it is ignored, we are requesting the City fund its own recommendation: a replacement and upgrade of the heating system, steam pipes, radiators, water pipes. In addition, to complement the new system, the building needs to have repairs to the buckled floors, damaged ceilings and sheet rock, as well as installation of new energy efficient combination windows and doors in keeping with the look of the historical structure. With the cut in the City operating budget in recent years, the Bartlett is being double penalized by being forced to use operating funds that could be dedicated to teaching the area's children and adults and programming instead of wasting them on excessive oil usage and repetitive band-aid repairs to the system that the City should be providing as the landlord--adequate heat, hot water, and safe plumbing.

CP6571 PAVEMENT MARKINGS

Install durable pavement markings such as centerline, lane line markings, pedestrian crossings, & parking spaces etc. Replace pavement markings on roads that have been overlaid and/or reconstructed with epoxy paints in conformance with regulatory requirements, new technologies, and the public's expectation for well-marked roadways as part of an on-going planned program for safe traffic operations. It is intended to use more durable type of material such as Epoxy and Thermoplastic rather than paint. This will extend the service life of the markings to multiple years vs. current practice of using paint which only lasts for one season.

CP6751 GOVERNMENT CENTER MICROGRID PROJECT

The City issued a RFP for Energy Services Company (ESCO) to identify potential energy & water savings to Stamford Government Center, as well as, Board of Education buildings. A Selection Committee chose Con Edison Solutions as the winning ESCO. The City has negotiated an agreement with the ESCO to conduct an Investment-Grade Audit (IGA) of all buildings in the project. The City will need to encumber the ESCO's "walk away" contingency fee (\$190,000) if the City decides not to proceed with the Energy Savings Performance Contract after the IGA is complete. Based on the IGA the City will negotiate an energy services agreement with the ESCO to implement the desired ECMs with savings guaranteed by the ESCO. Based on the savings guarantee, the City arranges financing to pay the ESCO to do the work.

CP6818 1050 WASHINGTON BLVD. ENVIRONMENTAL REMEDIATION

This request is used to perform environmental services at 1050 Washington Boulevard, Stamford (the "Site"). The Site was identified in earlier environmental assessments as meeting the definition of an "Establishment" as defined in the State of CT Property Transfer Act (the "Transfer Act"). By definition, this portion of the Site would require further investigation and remediation in accordance with State of CT Remediation Standard Regulations upon certain transfers of the real estate.

In November 2009, the City acquired the Site and submitted Environmental Condition Assessment Form to CTDEP. In accordance with the Transfer Act, the City must engage a Licensed Environmental Professional to oversee the investigation and remediation of this Establishment. Final report of investigation was due 2/4/2014, but was never submitted to CTDEEP.

CP7306 HIGH RIDGE ROAD & LONG RIDGE ROAD - IMPLEMENTATION

Implement short-term recommended measures from the HIGH RIDGE ROAD & LONG RIDGE ROAD corridor plan to improve quality of life, safety and operation and to accommodate non-motorized modes of transportation. Safety measures include installing plastic delineators between Vine Road and Dunn Ave to restrict left-turning movements. This would prevent crashes related to left turns, which is the primary cause of crashes in this area. Other urgent safety features include signal coordination, installing ADA ramps and pedestrian signals, high-visibility crosswalks, interactive speed signs, and enhanced bus shelters and landing areas.

Lucas automated chest compression unit. This request will allow all of our front line units to provide accurate and continuous automated CPR (chest compressions) to victims in cardiac arrest. These units are currently on three of the career units. In a pre-hospital real use study** the hands-on ratio with manual CPR was on average 78% with manual CPR and 91% with LUCAS CPR- as measured over the entire resuscitation episodes of approx. 33-40 minutes. The hands-on time of manual CPR decreased from 81% on the scene to 73% during transport, whereas LUCAS stayed at the same high hands-on ratio (90-92%) both on scene and during transport. We would like to have one Lucas on all of our front line units.

CP8219 TRAFFIC CALMING IMPLEMENTATION

To implement measures to improve safety and quality of life in residential areas and areas of high pedestrian use, based on the City's 2011 Traffic Calming Plan. The primary purposes of traffic calming projects are to minimize speeding and cut-through traffic in neighborhoods, reduce frequency of crashes, improve safety for non-motorized users, and improve safety and livability. The 2011 Plan provides a broad vision and numerous location-specific solutions for traffic calming in Stamford's neighborhoods. Traffic calming measures outlined in the 2011 Traffic calming plan include road diets, sidewalks, mini-roundabouts, intersection realignment, high-visibility crosswalks, sidewalk extensions, raised crosswalks or intersections, median islands and chokers, chicanes, diverters, street closure, establish on-street parking, and dedicated bike lanes. All of the location-specific recommendations are a direct result of a comprehensive public input process. One important aspect of certain traffic calming measures includes ADA accessibility, which is a federal mandate, and for many of the sidewalk and intersection projects, upgrading existing curb ramps to ADA-compliant curb ramps will be part of the project.

CP8702- SUMMER STREET CORRIDOR ACCIDENT REDUCTION PROGRAM

To reduce crashes on the highest density crash corridor on local roads in Stamford, the Transportation Department submitted a project to CTDOT's Local Road Accident Reduction Grant Program for \$792,404 to make systematic improvements on the Summer Street Corridor. The project consists of highly effective and proven measures to reduce crashes such as high-visibility crosswalks, sidewalk extensions, leading pedestrian interval signal timing, illuminated 'no turn on red' signs, illuminated 'turning vehicles yield to pedestrians in crosswalk' signs, retroreflective signal backplates, strategic on-street parking restrictions near intersections to improve sightlines, creation of new on-street parking where appropriate for traffic calming purposes, and speed radar signs.

This is a shovel-ready project, and will be coordinated with roadway resurfacing on Summer Street in 2017. Here are the primary construction costs below. Note that signal timing and signage have been accounted for in other capital accounts.

- Summer/Hoyt: Milling \$1,935, Paving \$15,000, Permanent Trech Repair \$1,100, Thermoplastic Crosswalk \$43,000, Concrete Curb \$7,000, Concrete/Brick Extension Fill \$67,500, ADA Strip \$480, ADA Curb Ramp \$16,000, Total: \$152,015

This project will accommodate implementing elements of comprehensive bicycle and pedestrian plan being developed to provide alternatives to automobiles. Implementation of this plan will be completed under different phases to contribute to a Complete Street strategy for building a safe, effective and well utilized bicycle and pedestrian network throughout the city, but predominantly most closely in the downtown, South Side, and interconnections to adjacent neighborhoods that will guide land use and capital budget decision on highway and sidewalk improvements for the next 10 to 20 years. A study is being initiated by the Regional Planning Agency currently known as WestCOG to be completed by next year.

CP8706- SIDEWALK EXTENSIONS

To construct sidewalk extensions, which are currently painted, along Broad Street and other prioritized areas of Stamford as a result of the 2011 Traffic Calming Plan. The painted sidewalk extensions do not have the same traffic calming effect as concrete. Sidewalk extension projects on Broad Street were also planned for in the 2008 Walkable Stamford Plan and the 2011 Towards a Livable Downtown Plan. In addition to extending the sidewalk and tightening the geometry of intersections, these projects include installing ADA-compliant curb ramps throughout the City, which is part of a federal accessibility mandate. Sidewalk extensions calm traffic by narrowing the curb radius, and slow the speed at which cars make turns. Many of the crashes occurring within the downtown and throughout Stamford happen as a result of turning cars which fail to yield to pedestrians. Sidewalk extensions are one of the major recommendations of the 2011 Traffic Calming Plan, and these have been planned, and some painted, throughout the City with the intention of constructing them in concrete. Priority areas of implementation are those near to schools or areas with a high percentage of pedestrians, vulnerable users or zero-car households.
