

Record unemployment, home foreclosures, people losing half their life savings - and the Board of Reps gives some of the highest paid uniformed workers in the nation a raise - so our taxes can go up even more. Thanks!!

What should be done:

No raises.

Shift staffing targets, not required minimums. You call in sick, you may be leaving the city less protected.

Scrap the volunteer fire department. They just aren't worth the headaches.

I've lived in a number of different towns. I have never seen uniformed personnel act like the prima donnas they do here. Any contact with them is an imposition.
