Mayor Dannel Malloy  
City of Stamford  
888 Washington Blvd.  
Stamford, CT 06904

Dear Mayor Malloy:

In lieu of recent events concerning pesticide contaminated wells in the Scofieldtown Road area, it is commendable that you took the action reported this morning in the Advocate that the Board of Representatives approve installation of public water lines to Mary Joy Lane and Alma Rock Road.

Since the City will be hooking up 190 Skymeadow Drive and Villa Maria and since my family and neighbors on Skymeadow Drive live within 1000 feet of contaminated wells on Very Merry Road, it would be very appropriate that we be hooked up, at the City's expense, to the public water line which already exists on Skymeadow Drive. This is a matter of public safety.

This morning I was contacted by the Engineering Bureau in order to set a time and day for the installation of a charcoal filter. This is an interim measure and we would hope that the City will attach our existing water lines to the Skymeadow public water line as soon as possible as a permanent fixture of the problem. The cost is minimal as you will be installing a new line on Mary Joy Lane which intersects Skymeadow Drive.

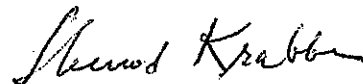

Respectfully submitted,

Dan Mena, Ed.D
