Dear Ms. Petrocelli,

The Boys & Girls Club of Stamford respectfully requests to re-allocate funds previously awarded for a security system project from CDBG 41 in the amount of \$16,000 to the CDBG 43 kitchen project that was awarded for \$34,324 in 2017. The security system project was put on hold due to the fact that our organization had plans to expand our building which would then require us to install a much larger scale security system. Therefore we did not move forward with this project at the time because it would not fulfill the need within our long term goal. The kitchen project is also a part of our expansion plan however is not a part of the new addition but a part of our existing building and we would be able to move forward with this project uninterrupted from the overall capital project.

The re-allocated funds would be used to remove our old existing grease trap which would be required to be updated with the moving of the 3 bay sink. This would require removal and filling in the space of the current grease trap and installation of a new grease trap that's compliant with WPCA standards and requirements.

Sincerely,

Michael Cotela
Executive Director
