Subject: Support for Ordinance banning plastic ware

Esteemed Board members,

More and more is being revealed about the harmful effects of ubiquitous plastic on the environment and in our bodies. I therefore urge you to support this ordinance so Stamford can be a leader in evolving us into a healthier city.

I do request that the ordinance be amended to have vendors include non plastic ware in take out orders as most people will be unaware that they must make a request for them, then get somewhere with their order and be unable to consume it.

Thank you for being proactive for our collective health. Please also consider addressing noise and air pollution, particularly in the south end and the west side, as the Advocate has published an article indicating deteriorating air quality. The State must be our partner in making this investment in our current and future wellbeing.

All the best,
Shelley Michelson
